Statewide Homeless Systems Needs Analysis

July 11, 2018

Goals of a Needs Assessment

Data Gives Planners, Agency Staff, Stakeholders, and Elected Officials Tools They Need to Understand What it Would Take to End Homelessness

- Conversation starter
- Estimates resources necessary to end homelessness (functionally)
- Provides assessment of types of interventions residents need
 - Helps jump-start planning discussions
 - Identifies gaps, strengths, funding required
 - Provides a look at systems feeding into homelessness

Collect Data

How a Needs Assessment Works

Systems/Populations Needing SH:

Child Welfare

Criminal Justice

Health/Behavioral Health

Residential Settings for MH, SUD, DD

Nursing Homes

Juvenile Justice

Foster Care

Systems Maps

Housing Inventory
Counts (HIC)

Homeless Count Data:

People
Experiencing
Chronic
Homelessness

Families

Youth

Individual Adults

Extrapolate Estimates Based on Research

Systems Feeding Into Homelessness: National or, to the extent available, state data on the number of people exiting institutional settings into homelessness, which allows staff to estimate the number of people entering homelessness or needing supportive housing over time.

How a Needs Assessment Works

Numbers: Estimates of individuals, families, youth needing <u>supportive housing</u>, <u>rapid re-housing</u> and other <u>affordable housing</u>, and <u>diversion</u> interventions.

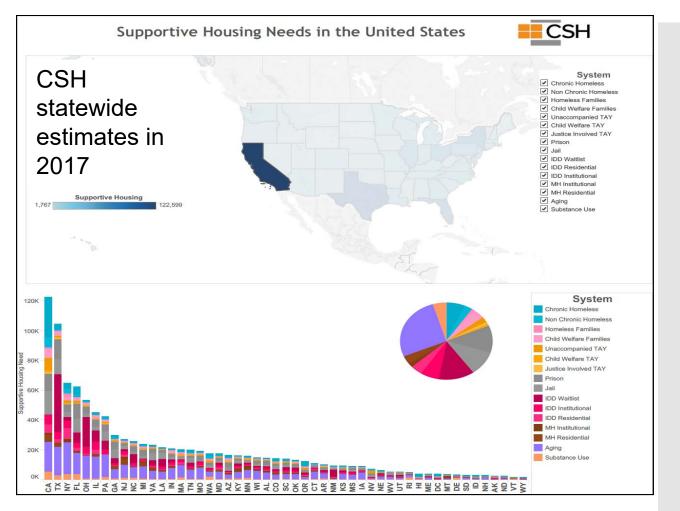

Financial Model: Staff use data on capital, operating, rental assistance, and services costs, based on statewide and local averages, fair market rents, and operating costs modeling.

Not an Exact Science

How a Needs Assessment Works

Estimates are as good as data received. Data from state agency staff would likely be more accurate than national data.

Approaches to Needs Assessment in California

Options
Considered by
Interagency
Working Group

Assess
homeless
systems in 3-4
homeless CoCs
with largest
homeless
populations.

Statewide Needs
Assessment

Assess
homeless
systems in a
cross-section of
2-6 homeless
CoCs
representing
geographic
diversity.

Assess
homeless
systems in all
CoCs in
California.

Needs Assessment in California

Statewide Needs Assessment

Assessment Identified by Interagency Working Group

Assess
homeless
systems in 3-4
homeless CoCs
with largest
homeless
populations.

- Los Angeles, Santa Clara, San Francisco, and (potentially) San Diego Counties
- Assess homeless systems in areas with greatest impact
- Use existing assessment data

Assess
homeless
systems in a
cross-section of
2-6 CoCs
representing
geographic
diversity.

- Analysis of differences in need, based on diverse cross-section of geographies
- Representatives of other CoCs of similar type
- Data availability

Timeline on depends on local buy-in wailability

Process

CSH Staff & Interagency Working Group

1. Collect Data:
Statewide Data &
Research

Large Homeless CoCs

Reach Out to Other Potential CoCs

2. Work with Council Members to Complete Statewide Assessment 3. Complete
Needs
Assessment for
3-4 CoCs with
Largest
Populations
(existing data)

4. Identify CoCs for Next Phase, Attempt to Obtain Local Buy-In to Gather Data

5. If Feasible,
Complete
Needs
Assessment for
2-6
Geographically
Diverse CoCs
(6-12 months)

6. Finalize
Statewide
Assessment,
Complete
Report,
Present to
Council &
Stakeholders

Partnership in Process

CSH Staff & Interagency Working Group

Phased Process: Feedback with Interagency Working **Group & Other State** Agency Staff, **Staff of Local** CoCs

Role of Council & Members

Accuracy & Quality Depend on Data Availability

to—
Identify Sources of Data,
Share Findings on Exits
to Homelessness,
Provide Local Contacts

Council Members Help

Provide Input on Direction of Assessment, Share Once Complete

THANK YOU!
